

Navitor Pharmaceuticals is pioneering the development of novel therapeutics for a wide range of diseases by targeting the activation of mTORC1, which responds to and integrates the cell's response to nutrient availability and plays a key role in protein synthesis and cellular growth. The company's founding intellectual property is based on the groundbreaking discoveries related to the mTORC1 pathway and nutrient signaling mechanisms by Dr. David Sabatini at The Whitehead Institute for Biomedical Research. The company is backed by leading financial and corporate investors, including Polaris Partners, Atlas Venture, Johnson & Johnson Innovation – JJDC, SR One, Brace Pharma Capital, Remeditex Ventures and Sanofi-Genzyme BioVentures. Position Title: Research Associate/Senior Research Associate, Biology

Description Summary: Navitor is seeking highly motivated and energetic research associates to perform research on projects supporting its drug discovery programs. Successful candidates will generate and analyze data, interpret results and create new methods and technologies for project advancement.

Responsibilities: Include but are not limited to:

- Collaborate closely with senior scientists developing and applying biochemical and cell-based approaches for the discovery and characterization of small molecule drug candidates.
- Assist with protein expression and purification.
- Perform cell-based and immunological assays.

Laboratory Experience: Includes but are not limited to:

- Highly proficient in the use of standard lab instrumentation and techniques.
- Proficient in standard techniques in molecular biology, biochemistry and mammalian cell culture as they relate to small molecule drug discovery.
- Preference will be given to those candidates having experience with: protein expression, purification and characterization; microplate-based assays and/or standard immunological methods including Western blotting and immunoprecipitation; and autophagy and related assays

Required Qualifications:

- BS, MS or PhD in a relevant area of scientific training with 2 – 4 years' relevant work experience in an industrial drug discovery setting.
- The ability to multitask and think critically and creatively and willingness to learn
- Excellent interpersonal skills with the ability to work well with others in a dynamic and highly collaborative environment. Strong preference given to those candidates with a demonstrated ability to work independently.
- Excellent organizational skills.
- Excellent verbal/written communication skills.
- Authorized to work in US.

Contact Info: Please email resumes to: careers@navitorpharma.com

Navitor Pharmaceuticals is an Equal Opportunity Employer. All applicants must be legally entitled to work for any employer in the United States.

Note to Employment Agencies: Please do not forward any agency resumes. The company will not be responsible for any fees related to resumes that are unsolicited.
